

FOR IMMEDIATE RELEASE

Speedmaster & John Force Racing Debut USA-ProStreet™ 8-71 Billet Supercharger – American-Made Pro-Level Blower Technology for the Street PCE159.1016.01

Los Angeles, CA – 28 October 2025 – Speedmaster proudly unveils the **USA-ProStreet™ 8-71 Billet Roots Supercharger**, engineered in partnership with **John Force Racing**, one of the most dominant and iconic forces in professional drag racing. Designed from a clean sheet and manufactured entirely in the USA, this next-generation billet blower delivers true championship-level supercharger technology to street and strip performance enthusiasts.

Co-developed with John Force Racing's elite engineering team, the USA-ProStreet™ 8-71 features fully CNC-machined billet construction, advanced 3-lobe twisted rotor geometry, and race-inspired airflow development borrowed from proven NHRA programs. The result is a modern Roots supercharger that offers superior airflow, exceptional strength, thermal stability, and precision rotor sealing for sustained boost levels and real-world reliability.

"The USA-ProStreet program represents a new chapter in forced-induction performance," said a Speedmaster spokesperson. "By combining Speedmaster manufacturing innovation with the race-winning blower expertise of John Force Racing, we've created a billet 8-71 that brings professional-grade power and response to serious street machines."

Engineered for explosive torque delivery from idle, razor-sharp throttle response, and robust high-RPM performance, the USA-ProStreet™ blower is built for enthusiasts who demand race-born performance with street manners. Designed for high-horsepower street, strip, Pro Street, and show-car builds, this American-made supercharger delivers unmatched presence and power potential.
